Cross-cutting policy priorities

Climate policy for the land use sectors

A Common **Agricultural Policy** for public goods

EU legislative framework to promote sustainable food systems

Action plan for the efficient use of biomass in the bioeconomy

> A European **Rural Deal**

Selected policies contributing to the scenario

Food waste reduction policies, including binding targets

Create fair food environments through an integrated mix of EU and national policies

Standalone Biodiversity Index

protection products

Strengthen coordination at landscape level and innovation partnerships

Price nitrogen surplus and the risk of plant

A Common Agricultural Data Space

Livestock farming

farming

Policy mix to reduce livestock emissions including pricing emissions

Improve animal welfare through standards, payments and labelling

Price emissions from peatlands

Support for pasture-based systems and economic alternatives

Agricultural peatlands

Long-term financial incentives for peatland

rewetting Support the creation of new value chains for

paludiculture and lignocellulosic biomass Support the cultivation of lignocellulosic crops

Efficiently utilising biomass to defossilise the economy

Align incentives to prioritise the material use

Forest

Stimulate carbon removals in forests

Incentives for adaptative forest management and afforestation management
